specific requirements

ISO/IEC 17025

accredited
calibration service

Full Spectrum Lab Services from CBRE is the premier service provider for all temperature related instruments in the lab. We serve both private and government sectors. Full Spectrum Lab Services offers calibration, maintenance, and repair services—along with design/build of custom environmental/cold storage for cGMP, R&D, and large storage facilities. Full Spectrum also offers validation services specializing in temperature mapping, documentation development (IQOQPQ) along with other comprehensive services, repair, and installation.

Supported Equipment:

- Ultra-low freezers, Laboratory freezers, refrigerators
- Lyophilizers (freeze dryers)
- Incubators (CO2, multi-gas, refrigerated and water-jacketed)
- Process chillers (for lasers, LCMSs, NMRs, etc.) and larger applications
- Sterilizers/Autoclaves (small, medium and bulk)
- Steam Boilers
- Washers (glassware/instrument, cart/rack and tunnel)
- Environmental Walk-In rooms (constant temperature and humidity, hot and cold)
- Environmental test chambers and rooms (variable temperature and humidity)
- LN2 dewar and cryo storage units
- Vacuum pumps (rotary vane type)

We also offer service for equipment including but not limited to: Ovens, Bottle Fillers, Bedding Dispensers, Warming Cabinets/Dryers.
